

Workshop 2 (2<sup>nd</sup> December | 17:00 CET):

## Flexible Joint Programs: challenges and opportunities for European Universities

The workshop aims to increase knowledge within the alliance on joint programmes through sharing of experiences in a "peer learning" format. This will support the alliance's reflection on the ERUA joint programmes to develop in the future.

During the workshop, we will clarify the key concepts and shared European terminology regarding joint programmes.

In addition, good practices examples by coordinators of joint programmes with different structures will be presented. The ARQUS Alliance will share their experience on developing flexible joint programmes.

Finally, there will be a focus on digital opportunities for joint programmes with the presentation of the strategic partnership project GO-DIJIP: Integrating Digital Collaborative Environments into Joint Programmes.

### Programme:

---

- 17:00**      **Welcome and introduction**
